

Depth noses are essential in ensuring perfect and constant engraving depth.

Steel noses - the most commonly used noses (resistant and highly polished for minimum plate scratching)

Teflon noses - for engraving on easily scratched material such as metal

Swivel noses - for engraving on curved surfaces (steel or teflon)

Prismatic noses - for engraving on jewellery items such as ID bracelets or bangles

Vacuum noses - same as steel nose + can be linked to swarf extractor

Diamond noses - provides better rigidity and accuracy than a non rotative diamond cutter - mainly used for photo engraving (Photostyle) and jewellery

AN-Nose cone 0.7mm
Non-Vac nose (20130)
\$35+gst

AN-Nose cone 1.5mm
Non-Vac nose (20131)\$35+gst
