- Reverse acrylic printing

DIRECT COLOR SOLUTIONS

Meet our newest flat bed, direct-to-substrate printer. With print speeds up to 5x faster than previous models, the Direct Jet 1320 offers unlimited customization. Better yet, our engineers constructed hot swap, field replaceable components to insure your printer is always performing for you. Plus, our modified Multisolve inks provide vibrant, full color imaging in a single pass. Seal in added durability with the clear overcoat option.

The Direct Jet 1320 images directly onto a variety of substrates including tiles, PVC, aluminum, wood, acrylic, crystal, electrical components, CDs, DVDs and more.*

From ad specialty to industrial, the applications are endless. So is our commitment to continual innovation.

*Note: All substrates should be tested for image receptivity with final acceptance and suitability determined by customer.

Direct Color Systems™

The Direct Jet 1320 also features:

- ◆ Optimized resolution - up to 5760 dpi
- ◆ No pre-coating or undercoating needed
- ◆ 8 chamber print head (CMYKWWCICI)
